

# CBMR

Version 6.3  
for Virtual  
Machines

Cristie Bare Machine Recovery

**Fast, automated**  
disaster recovery &  
data protection

**CBMR is powerful and easy-to-use software for the backup and recovery of critical servers. It also provides a full standalone backup solution.**

To ensure business continuity, virtual servers need protecting in just the same way as physical ones. **CBMR** can also be used to migrate from old hardware to a new virtual machine.

In the event of software corruption, **CBMR** can be used to recover the original OS in a virtual environment, and to migrate data from virtual servers back to physical ones.

Features	Benefits
<ul style="list-style-type: none"><li>- Dissimilar system migration from physical to virtual (P2V), virtual to physical (V2P), and virtual to virtual (V2V) on an Intel platform</li><li>- Automatic hardware and driver detection</li></ul>	<ul style="list-style-type: none"><li>- Quick, simple migration to and from virtual machines</li><li>- Simplicity of use</li></ul>
<ul style="list-style-type: none"><li>- Windows 2003 and XP on x86 and x64 computers</li><li>- Linux on x86, x64 and PPC platforms</li></ul>	<ul style="list-style-type: none"><li>- Supports widely-used systems and technologies</li><li>- 32bit and 64bit system support</li></ul>
<ul style="list-style-type: none"><li>- Linux Logical Volume Manager (LVM) and Microsoft® Dynamic Disk support</li><li>- Integration with IBM TSM event logging</li></ul>	<ul style="list-style-type: none"><li>- Seamless recovery of complex volume layouts</li><li>- Central location point for all backup information</li></ul>

**CBMR is 'Ready for IBM Tivoli' software and is re-sold by IBM globally**

Ready for

**IBM | Tivoli.**

for Virtual  
Machines**

**Cristie Bare Machine Recovery**

**Fast, automated  
disaster recovery &  
data protection**

***Licensing***

To protect a host machine which supports many guest virtual machines, a single CBMR licence is needed for the host server. To protect the guest virtual machines, a single CBMR-VM licence is required for every four guest machines. For example, in order to protect a host machine and ten virtual machines on the server, you would require one standard CBMR licence and three CBMR-VM licences. This would allow you to install and run CBMR to protect the host machine and up to twelve virtual machines.

***System Requirements***

	Windows	Linux
Disk Space	20MB	16MB
Memory	512MB	256MB
TSM Servers*	5.4 and above	5.4 and above
TSM Clients*	5.4 and above	5.4 and above
Versions	XP, 2003, Vista and 2008 (32 or 64-bit)	Intel platform & IBM p-series, Linux kernel version 2.4 and above

***Languages***

CBMR for Windows Virtual Machines is available in English, French, German and Japanese. CBMR for Linux Virtual Machines is currently only available in English.

CBMR can be downloaded from [www.cristie.com](http://www.cristie.com) or by contacting [sales@cristie.com](mailto:sales@cristie.com). Your trial lasts 30 days. The download is supplied as an .ISO file, which should be burned onto a CD. This CD is used to install the software and as the boot CD for Disaster Recovery.

Please contact **Cristie Software Ltd** to purchase a full licence.
