Cristie Bare Machine Recovery

Fast, automated
disaster recovery &
data protection

CBMR - one powerful product, providing multiple solutions

CBMR provides **complete data protection**, as well as the ability to recover critical servers from scratch within **minutes**. CBMR can be used as a standalone **backup** product and provides an ideal solution for server **migration**.

CBMR backs up the operating system and hard disk configuration of critical servers, enabling **rapid recovery** of data to an **identical state** following damage to or failure of the physical hardware, or a corruption of the operating system.

Features	Benefits
- Dissimilar hardware support	- Allows recovery to different hardware. No need to source an identical machine
- Multiple servers can be recovered simultaneously	- Easy to manage and schedule timesaving recoveries
- File-by-file backup: no need for a disk image	- Saves disk space, defragments OS files and avoids root-kit viruses
- Backups can be encrypted and compressed	- High level of security and saves disk space
- Save recovery configuration to network share or as part of the backup	- Convenience, flexibility and peace of mind
- Fully compatible with CMC	- Web-based remote recovery, restore multiple servers over a large geographical area
- IDE, SCSI, SATA and Fibre channel, hardware RAID, clustered servers, SAN and NAS support	- A true solution for all technologies
- Microsoft® Dynamic Disk volume support

CBMR

Cristie Bare Machine Recovery

Version 6.3
Windows

Fast, automated
disaster recovery &
data protection

How it Works

CBMR software is designed to **maximize speed**, flexibility and ease of use. Machine recovery only requires a standard CBMR boot CD and an IP connection to the network containing the CBMR backups.

Multiple servers can be **recovered simultaneously** and the recovery process normally takes only a few **minutes** for each machine.

By recovering your server in minutes, the time taken to recover a **whole data centre** can therefore be reduced dramatically to just a few hours.

CBMR is 'Ready for IBM Tivoli' software and is resold by IBM globally.

Ready for

IBM | Tivoli.

software

System Requirements

Disk Space 32MB
Memory 1GB (WinPE)
TSM Servers 5.5.x.x to 6.2.1.1
TSM Clients 5.5.x.x to 6.2.3.1

System Support

- Windows XP, Vista, Windows 7
- Windows Server 2003 and 2008
(32bit or 64bit), 2008R2 & Core
versions

CBMR download fully functional free trial

CBMR can be downloaded from www.cristie.com or by contacting sales@cristie.com. Your trial lasts 30 days. The download is supplied as an .ISO file, which should be burned onto a CD. This CD is used to install the software and as the boot CD for Disaster Recovery.

Please contact **Cristie Software Ltd** to purchase a full licence.
