

Fast, reliable recovery for NetWorker users

Fast, automated
disaster recovery &
data protection

NBMR

NBMR is powerful, easy-to-use software that provides fast machine recovery direct from EMC NetWorker backups.

NBMR allows users to recover their operating system directly from a NetWorker backup to similar or dissimilar hardware. Recovery points available in NetWorker are also available to NBMR.

Bare Machine Recovery for EMC NetWorker users

Backups and restores performed by NetWorker, retaining the features and advantages of that software

Multiple servers can be recovered simultaneously

Designed to maximise speed, flexibility and simplicity of use

Rebuild a server OS in under ten minutes

No separate backup software to install, schedule and administer

NBMR means no additional backup of the operating system files as NetWorker handles all backups. There are no additional disk or tape storage requirements and no network bandwidth is used for additional backups.

Reliable, Rapid Results with NBMR
