## BMR for TSM

**Fast, automated**  
disaster recovery &  
data protection

**TBMR** is powerful, easy-to-use software, providing **fast machine recovery** direct from Tivoli Storage Manager (TSM®).

TBMR for **AIX** allows users to recover their operating system **directly** from a TSM backup.

TBMR **protects** mission critical servers from the consequences of both physical damage and corruption of the operating system.

TBMR is resold globally by IBM as the **BMR solution** for TSM.

Features	Benefits
- Storage of configuration data with back-up data	- Peace of mind and easy organisation
- Logical volume and RAID software support	- Enables backup of logical volumes and software RAID
- Backups and restores performed by Tivoli, retaining the features and advantages of that software	- Single software solution
- Command-line and curses-based interfaces	- Incremental backups
- Boot from either custom-built CD or from network using PXE or NIM	- Backup versioning
- Enables rapid recovery to an identical server state	- User chooses preferred interface
	- Flexible usability
	- Fast, reliable response solution

### ***How it Works***

**TBMR** for **AIX** consists of a set of server configuration files and a bootable Disaster Recovery (DR) environment held on CD or DVD.

The boot image contains a **customized** AIX operating system (built on the user's machine), together with specialist file-system tools developed by Cristie, to provide a fast, **automated** and reliable disaster recovery solution for AIX.

**TBMR** will configure volume groups and logical volumes before restoring files to any number of new or existing disks. Files are **restored** using Tivoli's storage manager backup/archive client.
