BMR for TSM

Fast, automated
disaster recovery &
data protection

TBMR is powerful, easy-to-use software providing **fast** machine recovery software direct from Tivoli Storage Manager (TSM®).

TBMR for **HP-UX** allows users to recover their operating system **directly** from a TSM backup to similar hardware.

TBMR **protects** mission critical servers from the consequences of both physical damage and corruption of the operating system.

Features	Benefits
Storage of configuration data with backup data	Peace of mind that the backup is complete
Backups and restores performed by Tivoli, retaining the features and advantages of that software	- single software solution - incremental backups - backup versioning
Command-line and curses based interfaces	User chooses preferred interface for enhanced usability
Logical volume support	Enables backup of logical volumes
'Tivoli Ready' software	Trusted, endorsed and sold by IBM
Schedule automated recovery sequences	Enables recovery with no user intervention

TBMR

BMR for TSM

Version 6.1
for HP-UX

How it Works

TBMR for **HP-UX** consists of a set of server configuration files and a bootable Disaster Recovery image held on CD or DVD.

The boot image contains a **customized** HP-UX operating system (built on the user's machine), together with specialist file-system tools developed by Cristie, to provide a fast, **automated** and reliable disaster recovery solution for HP-UX.

TBMR will configure volume groups and logical volumes before restoring files to any number of new or existing disks. Files are **restored** using Tivoli's storage manager backup/archive client.
